

## Task Cards

Scrum Master	Sprint #	User Stories	To Do	In Progress	Completed
Ali Taquie	2	As a student, I want to be able to sign up for classes so that I can learn more about that subject [10]		<ul style="list-style-type: none"> <li>- Implement sign up for class screen (6)</li> <li>(almost finished need to fix double search bug)</li> </ul>	<ul style="list-style-type: none"> <li>- Implement class button: redirects user to sign up class page if student (2)</li> <li>- Implement sign up for class screen (6)</li> <li>- Pull information from database to populate list to show student (10)</li> <li>- Implement class screen input fields for filtering (2)</li> </ul>
Ali Taquie	2	As a teacher, I want to teach new classes so I can share my knowledge [13]			<ul style="list-style-type: none"> <li>- Implement class screen input fields for class details. (2)</li> <li>- Connect screen inputs to database (10)</li> <li>- Connect users and events in the database. (8)</li> <li>- Testing to see if students can see. (4)</li> </ul>
Ali Taquie	2	As a student, I want to see all my classes for this month so I can plan ahead [5]			<ul style="list-style-type: none"> <li>- Implement calendar template that Matthew found (10)</li> <li>- Make sure that calendar is able to be populated from the database that is connected to that student. (14)</li> <li>- Implement logic so that there is a dot under the date when there is a class. (4)</li> <li>- Implement a listview to list all classes that day. (4)</li> </ul>

Ali Taquie	2	As a student, I want to learn more about this teacher's class so I can see if it aligns with my interests [8]		Implement a screen that displays the details of the class after clicking on it from the calendar screen. (4) (halfway finish just need to display specific class details like teacher name, group or private etc)	- Make another database field that holds event details. (2) -Make sure that the teacher can populate event details when creating class. (4)
