

UI/UX

- ❖ Login Screen Input fields for email and password are white and really hard to read, should be changed to black (FIXED in bb-ali branch)
- ❖ Sign Up Screen Input are white and really hard to read, should be changed to black (FIXED in bb-ali branch)
 - Low priority but maybe picking a role student/teacher ui can be improved
- ❖ In the homescreen, if I am signed up for a class and its today, today's date is black which is super hard to read (FIXED in bb-ali branch changed it to white)
- ❖ ClassInfo page, when a class is expanded the sign up button gets pushed down and a third of gets off screened (FIXED in BB-ali branch)
- ❖ Go back button can look more streamlined if it was simply just an arrow, in some pages it takes a lot of space (FIXED in BB-ali branch)
- ❖ In the Profile Screen, the Log out button is off screened and pushed to the bottom. (FIXED in BB-ali branch)
- ❖ In the calendar and everywhere else, the time of a class is in normal time however in the review page the time is in military. Should be fixed to normal time (FIXED in BB-ali branch)
- ❖ The profile screen shouldn't have a title saying "Profile Screen" either change it to "Profile" or remove it completely to be more intuitive.
- ❖ writing a review needs to be able to read your own review meaning keyboard should push it up (FIXED in bb-ali branch).
- ❖ push items into absolute spots on ClassInfo screen (Brian)
- ❖ Add modal for write a review page (ali)
- ❖ click away for keyboard on **EVERY** screen (Brian)
- ❖ When testing on iPad/different devices the profile Image location is weird
- ❖ Slight description of "group or private" might be useful as it can be initially confusing to know the difference - im thinking what if we have an additional information icon here that can be like a modal that just says group: classes that are meant to be held with multiple students

Private: classes that are meant to be held one-on-one

(ali)

- ❖ Push profile container up so we can see class history
- ❖ Push teacher reviews container up a bit so we can see it fully navigating from calendar
- ❖ Consistent % values for the styles on all screens

Bugs

- ★ ~~The sort button on moreInfo does not work for “Earliest Date” or “Latest Date”. I recommend either fixing this or getting rid of those two options completely. Also i recommend calling it “Newest” and “Oldest”~~ **brian bae**
- ★ Add conditional where star rating is required in review page **brian bae**
- ★ ~~For some reason, if I am bringing the calendar down and kind of “slam” the calendar, it bounces back up a third of the way and gets stuck. (hard to explain over google docs with words, i can show u guys this bug in stand up meeting -Ali) (low priority)~~
- ★ ~~In the profile screen when I add a picture, it pushes the log out button completely off screen.~~
- ★ In the profile screen when I add a picture, it doesn't save (This error is already getting take care of by BH and Bruce)
- ★ ~~When I search for a class and the teacher has no ratings we get the following: “Error calculating teacher rating: [TypeError: Cannot convert undefined value to object]”. There should be an error handling statement for this. (try searching for arabic class on app to understand what i mean)~~ **matthew**
- ★ ~~^ the above error continues when I click moreInfo, we need a error handling statement if there is no reviews~~
- ★ still have that expandable item issue where it won't expand on the first touch
- ★ We need a restraint, that teachers can't create classes that exist in the past
- ★ ~~We need a restraint that students can't sign up for classes that exist in the past~~ **matthew**
- ★ ~~We need a restraint that if an event is “private” then only one student should be able to sign up for it and then it should disappear~~ **matthew**

- ★ We need a restraint for students, they shouldn't have the option to review classes that are in the future and I haven't taken yet?
- ~~★ Require reviews to have both a star rating and teacher review~~

Questions/Misc:

- ~~❖ If a class is private, should multiple students be allowed to sign up for it?~~
- ❖ Should the "Don't have an account? Register here" button should be blue to stay consistent with the login button and simply just called register ?

GIF:

- Make a new student account and sign up for a class
- Write a review and look at it from the calendar and show reviews
- Teacher makes class
